

# The Twelve Sums of Mathsmas!

## EYFS

---

With the days counting down towards the end of term, you'll want to keep pupils learning - but without dampening their spirits, of course. The Twelve Sums of Mathsmas helps you do just that, by giving children opportunities to practice their skills with number operations in a festive way.

Year Group: EYFS

Outcome: Gaining practice in the use of number operations (addition and subtraction)

Preparation: Print out the worksheets. There's also a version just for you - complete with all the answers!

Instructions:

You can either:

1. Work through the activity as a whole group.

or

2. Challenge more mathematically able pupils to tackle the activity individually or in pairs - with other children working through it in table groups.

Note: In Sums 11 and 12, it's the number of baubles that are important - not the number of Christmas trees!
