# SHAKESPEARE

## Twelfth Night - Malvolio

Malvolio is Lady Olivia's steward. His job is to look after her and any guests - and to make sure that the house runs smoothly.

### Style Icon

Malvolio has the potential to become a cowwalk sensation - who else would parade round in a pair of weird yellow stockings?

### The Importance of Being Earnest

Malvolio takes life seriously - very seriously indeed. Some people might say he's a bit of a killjoy - but he actually just wants to make sure that things are just right. And what more could you ask from a steward?

### A True Gentleman

Malvolio is secretly in love with his employer, Lady Olivia - although he wouldn't dream of embarrassing her by making the first move! And he would go to the ends of the earth for her - even ending up in prison!

### No Nonsense

Malvolio isn't afraid to speak his mind, if he thinks the situation demands it. So when two of Lady Olivia's guests, Sir Toby Belch and Sir Andrew Ague, are drinking too much and disrupting the household, he's quite prepared to let his feelings be known!

### Seeing the Best in Others

On the other hand, Malvolio would always prefer to see the best in people. So even when other members of the household play a cruel trick on him, he doesn't actually realise what's going on until things have got way, way out of control.

### There's Always a But...

But Malvolio is undoubtedly pompous. He thinks he's better than the people he serves - and that he'd make a wonderful husband for Lady Viola!
